

AspirePharmaceuticals

Aspire Pharmaceuticals adds an extra layer of security with CoSoSys' Endpoint Protector A50 Hardware Appliance

PROFILE

Industry

Pharmaceuticals

The Challenge

Implement a very granular Data Loss Prevention solution with a straightforward deployment and a quick server-client response if security policies are changed

The Solution

Endpoint Protector 4

Why Endpoint Protector?

- Extremely granular
- Block USB devices
- Quick server-client response to policy changes
- Straightforward deployment
- Intuitive and user-friendly interface
- Competitive Pricing
- Excellent Support and Services

COSSOYS

Data Security Care

Aspire Pharmaceuticals meets all their criteria of monitoring employees' activity and related data transfers

About Aspire Pharmaceuticals

With over 50 years of industry experience, Aspire's management team can put the latest technology to work for you. Their stringent procurement process provides only the best materials, and their rigorous analysis ensures the best results. Whether you need to create a new dietary supplement or speed your product to market, your brand deserves nothing but the best. That's why Aspire Pharmaceuticals specializes in creating the highest-quality soft gelatin and nutritional supplements on the market.

The Challenge

As a company in the Pharmaceuticals industry, Aspire needs to secure an extensive range of confidential data. They were looking for a solution that would add an extra layer of security while closely monitoring employees' activity and related data transfers. Among the key features the product would have to provide is granular control of the policy and how quick the server and client updated if the access level is changed at any given point.

The solution would have to meet all their criteria in a cost-effective way.

>>

“We chose Endpoint Protector because it met all of our criteria in the most cost-effective way. The deployment via the user interface is straightforward. Our company was set up within hours and the support and service offered by CoSoSys are excellent.”

**Accounts Manager
Jay Patel**

The Solution

Aspire Pharmaceuticals looked at other Data Loss Prevention solutions on the market. They decided that the Endpoint Protector 4 A50 Hardware Appliance from CoSoSys meets all their criteria while being the most cost-effective option.

The key feature of providing detailed control over the users’ access rights convinced Aspire to choose Endpoint Protector. On a scale of 1 to 5 (one being “poor” and five being “excellent”), Jay Patel – responsible for administrating Endpoint Protector - described the list of features, ease of installation, ease of use and competitive pricing as excellent. The quick server-client response to policy changes as well as documentation and resources throughout testing and implementation were also ranked as excellent.

The deployment process ran as expected and the user-friendly interface along with the support and services offered by CoSoSys were ranked as excellent. “Their deployment via the user interface is straightforward. Our company was set up within hours of starting Endpoint Protector. My experience with Endpoint Protector has been very great so far. I did not have to contact support for issues as we did not have any problem with Endpoint Protector since we implemented it months ago. The customer service representative who I have dealt with since the beginning communicates very promptly and is always ready to help.”, said Jay Patel.

About Endpoint Protector Security Solutions

Endpoint Protector 4 protects Windows and Mac computers against data loss, data theft and data leakage by monitoring and blocking file transfers to cloud services and applications like e-mail, Skype, web browsers and many others through Data Loss Prevention. The solution controls also portable storage devices like USB sticks, CDs/DVDs, HDDs, memory cards and others on Windows, Macs and Linux endpoints. It provides strong security policies, preventing users from taking unauthorized data outside the company.

Endpoint Protector allows companies to stay productive while keeping their most valuable data safe. Endpoint Protector makes work more convenient, secure and enjoyable using mobile and portable devices, and delivers excellent ROI.
